AFTER LIP ENHANCEMENT OR WRINKLE FILLERS

Remember Juvéderm is temporary and follow-up treatments may be needed. Make an appointment to see Dr. Bahi one week after the procedure to review your results.

How you will feel

Swelling may be pronounced, lasting for two or three days. Some mild pain can be experienced, but will be gone within hours.

What to do after the procedure

If you have swelling at the injection site, you can apply an ice pack for a brief period. Normal activities can be resumed immediately, though you are advised to stay out of the sun and not do any vigorous activity. Also avoid any strenuous exercise, or consumption of alcoholic beverages. Exposure to the sun or alcohol may cause temporary redness, swelling, and/or itching at the injection site.

Diet instructions

Resume your normal diet.

Medications

You will not need any prescriptions afterwards.

If problems do occur

Unmanageable pain, as well as symptoms that are progressive or abnormal, should be reported to Dr. Bahi immediately.

Contact Information

It is our desire that your recovery be as smooth and pleasant as possible. Following these instructions will assist you, but if you have questions about your progress, please call the office at 604-507-0514. Please try to call during office hours; however a 24-hour answering service is available for after hours contact with Dr. Bahi. For after hours please call 604-507-0514 and then press 1 when the recording begins.
